DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-4, 9-10, 12-14, 23-25, 50-51, 54-59, 63-69 drawn to an arrangement for connecting decorative ornaments, classified in class 248, subclass 303.
- II. Claims 29-39 and 61-62 drawn to a device for hanging a decorative ornament on a fixture, classified in class 362, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination, respectively.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claim calls for a fixture adapted to receive the hook of an ornament having a mounting hook. In the art, there are multiple ornaments with mounting hooks that could be adapted to be received in the fixture. The claimed fixture does not require the particulars of the subcombination. The subcombination has separate utility by itself, or it could be hung from a variety of different fixtures, not just the one as claimed.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3677

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
